Take Home Devices—Getting Started—WiFi and Login

What you need:

1: Your WiFi network name: If you are utilizing a public/sponsored hotspot or have separate activation instructions from an Internet Service Provider (ISP) such as Cox, CenturyLink, or a Cellular Hotspot (Verizon, T-Mobile, AT&T, etc.) please refer to those instructions first.

2: Your WiFi password: This is provided by your internet provider, please contact them for support or refer to their documentation. It may also be labeled on the side of your modem.

Start up your device and please wait for Windows to load, it should start to the lock screen, pictured right. Press any key to proceed to the login screen, pictured below.

When you’re at home, you’ll need to connect your personal internet connection, laptops will only connect to TUSD WiFi in range of a school. Clicking the “Internet” icon assumes you are already in range of your personal WiFi network.

Once you click on the “Internet” icon on the bottom left corner of the screen, it will load a list of nearby available WiFi networks. Click the network that belongs to you and has been supplied by your internet provider, then click “Connect”
Your next step is to type in your WiFi password. Once you’ve done that, click “Next” where you’ll be asked a question about network discovery, simply click “No” and then your device should show “Connected”

If you receive an error message, please double check your password and try again or reach out to your internet provider for support.

Once you’re connected to WiFi and the internet, you’re free to login to the computer. You must use your FULL staff or student email address, then type your Windows password. The computer will then spend a few minutes building a profile for your use. Please enjoy your teaching or learning experience!

Staff: Use your full email address

   Example: firstname.lastname@tusd1.org

Students: Use your student number with @s.tusd1.org

   Example: 0032324596@s.tusd1.org
