Getting logged in.

1. Start by launching Zoom from the app drawer. The icon to pull up the app drawer is the circle in bottom left corner of the screen. You will see Zoom appear as an app.

2. Zoom will launch. Please click the “Sign In” tab, then “Sign in with SSO”
3. On this next screen, type “tusd1” for the domain. Alternatively it may need you to type your full email if it does not include the “.zoom.us” but in most cases it should be like the example below.

4. It will then redirect you to the Microsoft login screen. You will type your 10digitmatric@example.tusd1.org along with your Windows password (Note: This password is the one you’ve been using to access Office 365, it may be different than your Chromebook login)
5. You will then be directed to type in your password like below. Again, use your full email address for the username when signing in.

6. Next, you will be asked if you want to stay signed in, feel free to click “Yes”

7. You are now signed into Zoom. Clicking Zoom invite links will now automatically launch in Zoom. Alternatively, you can click “Join a Meeting” type in the Meeting ID supplied by the teacher or host of the
meeting, your name (which should autofill) and “Join”
