Re: Prioritization Exercise

Dear Members of the Bond Fiscal Oversight Committee,

During the first of the month, two exercises in prioritizing schools by need were conducted to assist in providing some guidance for moving forward with general renovations in our schools.

The exercise consisted of dividing the schools randomly into five groups. The individuals participating in the exercise were then divided into five groups and assigned one of the five school groupings. Tools provided to each group included a set of executive summaries, a score sheet and a sheet for the top five schools.

The first group to do the exercise was a team of Engineering, Facilities and Planning supervisory level staff, EF&P project managers and departmental directors.

The second group to participants, following the joint meeting with the Governing Board, where sorted into teams of three consisting of a EF&P staff member, a principal supervisor and a member of the BFOC. We want to thank those members of the committee that participated.

Attached to this email is a chart that shows the result of the two exercises and is provided for discussion at the BFOC meeting of October 5th.

Sincerely,
Marcus E. Jones, R.A.
Director of Bonds
