SCHOOL DISTRICT

Important Device Responsibility Notice from TUSD Technology Services

Our Commitment to Digital Learning

The Tucson Unified School District (TUSD) is proud to loan every student a personal learning device (laptop, tablet, hotspot). This technology is essential for actively engaging in **next-generation learning**, empowering students with digital skills, and ensuring equitable access to educational resources both in and outside of the classroom.

To sustain this program and continue supporting the excellent digital learning environment your student experiences, we must ensure all devices are handled with care. The device loaned is a valuable educational tool, and we ask that parents/guardians and students partner with us to protect this investment.

Student and Parent/Guardian Responsibility for Devices

By providing a device, TUSD entrusts students and their families with its care. Please review the following policies regarding the responsibility for District-loaned devices:

1. **Financial Obligation:** Students are responsible for the full cost of repair or replacement for all damaged or lost devices (including chargers and any accessories), whether the damage was caused directly by them or if they were involved in the circumstances leading to the damage.
2. **Replacement Cap:** Students are limited to a maximum of two (2) accumulated incidents of damaged or lost devices including charging blocks and charging cord (laptops, tablets, and hotspots). After the second incident, no additional devices will be issued except for testing purposes.
3. **Restoring Eligibility:** Full payment for a damaged or lost device/chargers removes that incident from the student's record. This allows the student to potentially restore their eligibility for future device replacement, provided that the two-incident cap is not exceeded.

Action Required

Please take a moment to review this policy with your student. Your cooperation ensures that all TUSD students continue to benefit from this vital technology.
